

# ELECTRO POLISHING QUALITY WIRE

## INTRODUCTION

### Application:

As the standard of living has been improving in various countries in the world, the articles made from E.P.Q. wire have become very popular. The utensils made from stainless steel wire have gradually been taking the place of those made of plastic, aluminum or ceramics.

Our E.P.Q. wire is well accepted by our customers because of its beautiful non-porous, bright surface and its excellent formability. Our wire is widely used in the manufacturing of pet cages, kitchen utensils, grill racks, decorative handles, and wire baskets among many other applications.
